Public Emergency Management Plan

The Town of Eston and the RM of Snipe Lake Regional Emergency Management Plan

The Town of Eston and the RM of Snipe Lake has a regional emergency plan that coordinates the community's response to any major event or emergency. The plan, which is constantly evolving, goes hand in hand with the Saskatchewan Provincial Emergency Management Plan.

There are six main components to the plan. These are:

- **The Public Emergency Management Plan – It describes the methodology and general process that the municipality will use to respond to emergency events as well as the bylaw that established the planning process, but contains no confidential information. This section also contains information that individuals can use to create a personal/family/business plan to assist in emergency situations.**
- Council Emergency Plan – This plan is specific for Municipal Mayors/Reeves and Councilors. It describes their roles and responsibilities, how to declare a local emergency and provides background information on emergency management in general.
- Emergency Response Plan – This plan is for the Emergency Management Organization Coordinator and the Emergency Operations Center Team members. It describes roles and responsibilities of the Emergency Operations Center Team members as well as outlining how to establish and operate the Emergency Operation Centre.
- Emergency Information Plan – This is the crisis communications plan. It outlines the how information will be shared, including public notification and media releases.
- Evacuation Plan – This plan is for emergency services staff who are in tactical command of an incident site(s). Their tactical operations achieve the goals and priorities of the Emergency Operations Centre and Council. This plan provides direction for escalating events from day-to-day emergencies to fully supported major disasters.
- Plan reference section – containing contact list information for people and resources as well as forms and other emergency operations center documentation.

Public Emergency Management Plan

INTRODUCTION & APPROVAL

The contents, of this Emergency Response Plan, provide guidance for the Town of Eston and R.M. of Snipe Lake to respond effectively to an incident or major emergency.

This document will not prevent the possibility of an incident or emergency occurring. It is intended to provide citizens with information to make them as resilient as possible in times of emergency; this will allow our local authority and first responder to focus on those individuals that are in the most need of assistance. For your local authority and emergency operations center staff this plan will aid in providing a prompt and coordinated multi-agency response, thereby reducing human suffering and loss or damage to property or the environment.

For this plan to be effective, it is important that all concerned are made aware of its provisions and that every official, agency and department be prepared to carry out their assigned functions and responsibilities in an emergency.

The public must be informed about the Emergency Planning and educated as to certain elements (i.e., Warning and Evacuation Procedures).

The Emergency Response Plan is a living document that will be amended as necessary.

COMMUNITY PROFILE

The Town of Eston is located in the heart of West Central Saskatchewan at the junction of Highways 44 and 30. The Town boasts a busy business district with services including a pharmacy, a grocery store with fuel and liquor vendor, motels, restaurants, a gift shop, card locks, a car wash, and 2 banks.

The Town has locum physicians, a nurse practitioner, a clinic, a health center, long term care facilities, emergency response services, a fire department and a RCMP detachment. A large multi-use community recreation and convention center provides year-round recreational opportunities. The Eston Lions Swimming Pool is open during the summer season.

Eston has an airport on the outskirts of Town with two paved runways; #11 is .92 km long while #16 is 0.60 km long. Eston is located within the boundaries of the Rural Municipality of Snipe Lake No. 259, an oil-rich area which also boasts prime agricultural land and many opportunities for hunting and fishing. The Town is approximately 20 km north of the South Saskatchewan River and the Eston Riverside Regional Park. The Lancer Ferry which crosses the South Saskatchewan River is nearby. Population of 972. Main industries include Oil & Gas, Agriculture, & Healthcare.

Public Emergency Management Plan

AIM

The aim of this plan is to provide a mechanism to handle any major emergency that threatens the health, safety and welfare of the citizens, or the environment, or property within the Town of Eston and RM of Snipe Lake.

EXCEPTION

This Emergency Response Plan does not apply to those day-to-day situations which can be handled by the responsible municipal service(s) on its (their) own.

AUTHORITY

This Emergency Response Plan is authorized in accordance with:

- The Town of Eston Bylaw No. 2025-02
- Rural Municipality of Snipe Lake Bylaw No. 2025-004
- *The Emergency Planning Act* - Chapter 8 E-8.1 of the Statutes of Saskatchewan

EMERGENCY DEFINITION

An emergency is defined as any abnormal or unique event which occurs with some degree of surprise to demand unusual, extensive and demanding response effort, however caused, which has resulted in or may result in:

- the loss of life; or
- serious harm or damage to the safety, health or welfare of people; or
- widespread damage to property or the environment.

A major emergency is a further escalation with the potential to exceed the community's emergency response capabilities. A major emergency will require resources from other communities and the province.

Public Emergency Management Plan

The most likely major emergencies that could occur within the Town of Eston and RM of Snipe Lake are:

- Fire (Structural/Forest/Grass)
- Dangerous Goods or Hazardous Materials release
- Epidemic/Pandemic or Health (Contaminated Water or Air Quality)
- Extended Utility Outage (Power, Natural Gas, water)
- Public Infrastructure Failure (transportation routes, sanitary septic, etc.)
- Severe Weather (Blizzard, Wind Storm, Tornado, Hail)
- Mass Transit Incident (Road, Rail)
- Major Aircraft Crash
- Flood
- Pipeline Leak/ Explosion
- Terrorism (Bomb, Shooting)
- Lost Person (Search and Rescue)

Emergency Response will be based on three levels as displayed in the following charts;

Level	Examples	EOC Director May:
GREEN Level 1 • Standby / monitoring • Low impact and short duration EOC at Mezzanine (Complex) • Minimal personnel • At the discretion of the EOC Director	• Weather advisory • Small isolated fires • Small confined chemical spills • Interruption of services (i.e. boil water advisory) • Hazards are contained in localized areas • Little media interest • Mutual Aid assistance requested	• Note the incident and take no further steps • Note the incident and request ongoing updates • Notify other EMO staff • Activate the EOC in whole or part

Levels	Examples	EOC Director May:
YELLOW Level 2 • High Impact / short duration • Serious or multiple events that affect the health and safety of the	• Severe Weather • Fire • Explosion (propane, fertilizer) • Utility loss, less than 2 days	• Consult with local authority and/or emergency services via phone

Public Emergency Management Plan

public or significant damage to property. EOC at Mezzanine (Complex) All primary EMO members notified At the discretion of the CAO/EOC Director	• Serious injuries or fatalities to the public • Compromised water or sewer • Moderate damage to the environment. • Gunman or Terrorism • May require evacuation of defined areas, less than 2 days • Potential to attract media interest	• Consider access to additional, short term resources • Consult with Local SPSA ESO • Initiate EOC protocol
--	--	---

Levels	Examples	EOC Director May:
RED Level 3 • Full activation • High impact / long duration • Major emergencies or disasters that require multi-organizational and are multi-jurisdiction • 24hr staffing (12hr shifts) EOC at Mezzanine (Complex) • All EMO members notified • At the discretion of the CAO/EOC Director	• Long term severe weather • Multiple serious injuries to the public or fatalities • Significant damage to property • Serious damage to the environment • Requirement to relocate services provided within the Town of Eston • Disruption to all areas of service • Shut down of utilities for more than 2 days • Significant news media attention • May require evacuation of the Town of Eston	• Lodge on Site • Be Present in Emergency Operations Center • Have secondary director on stand-by for relief of event

The EMO planning committee MAY be compromised of

Public Emergency Management Plan

- a) CAO of Snipe Lake and Town of Eston
- b) EOC Director
- c) Council Members from both Eston and Snipe Lake
- d) Fire Chief
- e) Eston RCMP Representative(s)
- f) Director of Public Works
- g) Public Sector Officer
- h) School Representatives
- i) Healthcare Representatives
- j) Oil and Gas Representatives
- k) Farming Representatives

The EMO committee can be broken into two sections, 1) An Executive Planning Committee and 2) An Operational Tactical Committee.

Public Emergency Management Plan

Emergency Information Flow Chart

Emergency Information Flow Chart

Public Emergency Management Plan

Emergency Operation Centre

The emergency plan enables the activation of an Emergency Operations Centre that will:

- Assist emergency personnel to respond quickly and effectively to potential disasters such as wildfires, major storms, chemical spills, floods, plane crashes, or tornados.
- Provide a concentrated assessment and decision-making body that can best utilize all available resources, and if necessary, resources from the Province.
- Prioritize recovery goals and objectives.
- Coordination of request for responding, mutual aid and support agencies
- Provide Policy direction to Incident site responders
- Provide communications and public/media information packages for elected officials use.

Emergency Preparedness

Disasters and emergency events have shown the need for individuals to be prepared to look after themselves, their families and pets for a minimum of 72 hours. There are many sources for important information:

www.getprepared.gc.ca/index-eng.aspx

<https://www2.gov.bc.ca/gov/content/safety/emergency-preparedness-response-recovery/preparedbc/prepare-your-home>

Emergency Kits

You may have some of these basic emergency kit items already. The key is to make sure they are organized, easy to find and easy to carry (in a suitcase with wheels or in a backpack) in case you need to evacuate your home. Whatever you do, don't wait for an emergency to happen. Think of ways that you can pack your emergency kit so that you and those on your emergency plan can easily take the items with you, if necessary.

What to include:

- Food (ready to eat) and water (2-4 litres per person per day)
- Flashlight and batteries, headlamp
- AM/FM radio (crank or battery)
- Medication/s
- Seasonal clothing
- Blanket
- Pen and notepad
- Cell phone charger
- Personal toiletries
- Small first aid kit

Public Emergency Management Plan

- Extra pair of glasses or contacts
- Cash in small bills
- Local map
- Whistle
- Out-of-area contact card
- Copies of important documents, family photos, etc. Consider storing copies on a USB stick
- Extra keys for vehicle and home

Recommended additional items

- Two additional litres of water per person per day for cooking and cleaning
- Candles and matches or lighter (Place candles in sturdy containers and do not burn unattended)
- Change of clothing and footwear for each household member
- Sleeping bag or warm blanket for each household member
- Toiletries
- Hand sanitizer
- Utensils
- Garbage bags
- Toilet paper
- Household chlorine bleach or water purifying tablets
- Basic tools (hammer, pliers, wrench, screwdrivers, work gloves, dust mask, pocket knife)
- Small fuel-driven stove and fuel (follow manufacturer's directions and store properly)
- Candles and matches/lighter
- Hand sanitizer or moist towelettes
- Zip-lock bag (to keep things dry)
- Garbage bags

Check your kit twice a year to ensure contents are up to date. Re-stock as needed

Special Considerations and addition will be needed for:

- Items for babies and small children—diapers, formula, bottles, baby food, comfort items
- Medical supplies and equipment

Emergency Preparation for Pets

If you are forced to leave your home, it's important to remember to take your pet(s) with you. Leaving pets behind, even if you try to make a safe place for them, is not the best option. Unfortunately, most emergency shelters can't accept pets, except for service animals such as dogs for the visually impaired, so you must plan ahead.

Public Emergency Management Plan

Start with relatives or friends outside your area, boarding kennels and vet clinics (remember that vaccination records may be required) that could shelter your animals during an emergency. Some motels and campgrounds allow pets too.

Once you have compiled a list remember to put a copy in your emergency kit. While you're at it include pet supplies (leash, portable kennel, food, and water).

If you have advance warning of a possible event or severe storm, keep your pets inside with you so you won't have to look for them if you are forced to leave your home.

Make sure your pets are wearing collars and identification tags.

Evacuations

Local Authority Evacuation Orders

Ordering an evacuation of all or part of an emergency area is a very serious step and requires detailed planning. In Saskatchewan, the Emergency Planning Act (1989) permits the head of a local authority to declare a Local Emergency, and that allows the local authority to order an evacuation should it be absolutely necessary. There are several other statutes (Fire Services Act, Wildfire Act and the Public Health Act) that can be used to order an evacuation.

When it is determined that an evacuation is required, the warning must be timely and accurate. While the main concern is the preservation of life, those displaced from their homes or businesses may be experiencing inconvenience, anxiety and fear.

Removing people from their homes and livelihoods must not be taken lightly. People will already be under duress during an emergency; however, public safety must be first. It is a delicate balancing act.

Evacuation Process

Stage 1 - Evacuation Alert

Authorities will alert the population at risk of the potential for evacuation because of the danger of possible loss of life and they should be prepared to evacuate the area. This warning will be transmitted by:

- Door-to-door campaign with pamphlets/letter delivered
- Radio and/or television broadcast
- Sirens and mobile public address announcements
- Telephone calls
- Electronic media (internet/social media)

Public Emergency Management Plan

Note: even at this stage, plans will be in place to move handicapped persons, vacationers, and voluntary evacuees. You should also consider readying extra supplies (clothes, shoes, sleeping bags or blankets, personal items (toiletries), playing cards and games for children) to supplement your emergency kit.

Stage 2 - Evacuation Order

The population at risk is ordered to evacuate the area specified in a formal written order. This is an order and as such does not allow for any discretionary decision on the part of the population at risk. They must leave the area immediately. The police will enforce the Evacuation Order. This order will be transmitted by:

- Door-to-door campaign with pamphlets/letter delivered
- Radio and/or television broadcast
- Sirens and mobile public address announcements
- Telephone calls
- Electronic media (internet/social media)

The area in question will have controlled access and that a pass may be required to regain access to the area.

Stage 3 - Rescind

An evacuation order or alert is rescinded when it is determined to be safe for residents to return home. An evacuation order may be reinstated if a threat returns. These reentry criteria will be communicated to evacuees by:

- Radio and/or television broadcast
- Telephone calls
- Electronic media (internet/social media)
- Pamphlets, letter or signage at reception centers

Reception Centers

Reception centers are sites (staffed by Emergency Social Services [ESS] or Red Cross volunteers) where evacuees may be received during an emergency/evacuation. They may be a facility such as a recreation center, community center, church hall or school - it depends on what is available in the community or what is needed.

Reception centers should be flexible for multipurpose use. Space may be required for use as a gathering and information center, a staging site for volunteer disaster relief workers, a site where insurance adjusters can operate, an emergency daycare center, etc.

Public Emergency Management Plan

Reception Centers are set up in order to provide for essential needs of people affected by an emergency/evacuation.

Emergency Reception Centers are located at:

- Community Complex, houses 500 plus people with a kitchen, bathroom and shower.
- Full Gospel Church, houses 600 plus people with a kitchen, bathroom, showers
- Out of Town Evacuations will be directed towards Kindersley.

Shelter-In-Place

In some circumstances - for example, where evacuees would have to travel through a plume of hazardous gases - it may be safer for people to take shelter in their homes, schools or places of work.

If you are advised to shelter in place, follow these instructions:

- Get inside as quickly as possible
- Turn off all heating, ventilation and air conditioning systems. Close vents.
- Close all doors, windows, fireplace flues, vents and other openings. If there are any gaps in the weather stripping, use duct tape, plastic wrap and/or aluminum foil to seal the leaks.
- Close drapes, curtains and shades. Stay away from external windows.
- Use stairwells instead of elevators wherever possible.
- Turn on the radio or television for information. You will be advised what the hazardous material is and what the signs and symptoms of overexposure are.
- Use telephones only if you need immediate emergency assistance. You will be directed how to seek medical help outside the evacuation area.

Home Escape Plan

During a fire there is no time to stop and think about an escape route - every second is important! Being prepared before a fire occurs can save your life!

So, make an escape plan and practice it with your family today. There are four simple steps when making an escape plan:

Step 1: Install working smoke alarms

Public Emergency Management Plan

Smoke alarms save lives

Install a working smoke alarm on every level of your home and outside sleeping areas. For maximum protection install smoke alarms in every bedroom, especially if you sleep with your bedroom door closed. Test your smoke alarms monthly to ensure they are functioning properly. If you require assistance with smoke alarm installation, please contact the RM Administrator so we can have the Fire Department assist you.

Step 2: Draw a floor plan of your home

Make sure you have a safe way to reach the ground

Make an outline of each floor of your home and label each room. Identify at least two exits from each room. Windows can serve as the second emergency exit. If a window is considered an exit, make sure all family members can open the locks and windows easily for a quick escape. Security bars on windows and doors must have a quick-release mechanism to make escape possible.

Step 3: Choose a family meeting place

Public Emergency Management Plan

The meeting place should be a safe distance away from the house. All family members should be taught to report to the meeting place after escaping a fire. One person should go to a neighbour's house or the nearest phone in a safe location to contact 9-1-1 or their local emergency number. Know the emergency telephone number for your area.

Step 4: Schedule a home fire drill

Practice getting out of the house through the various exits by holding fire drills. Practice your escape plan by having a fire drill at least twice each year.

What should I do if there is a fire?

Touch test the doors before opening

Get out quickly and safely. When the smoke alarm sounds, immediately start your escape. Do not try to gather possessions or pets.

Check the door. Stay low behind the door, reach up and feel the door and the door handle for heat.

If the door feels cool, brace yourself against the door and open it slowly. If it is safe, leave the building and go directly to your meeting place. If you encounter smoke, crawl low under the smoke. Cleaner air will be near the floor. Once you are out of the building, stay out.

There is nothing more important in your house than you and your family. Go to the meeting place to make sure everyone is safe. Phone 9-1-1 or your local emergency number from a neighbor's house.

Public Emergency Management Plan

If the door feels warm, or you see smoke or flames on the other side of the door, shut the door, and use your second escape route. If you must escape from an upper story window of a multi-level home, make sure you have a safe way to reach the ground, such as a fire escape ladder.

If you are trapped, seal the openings around the door and vents with wet bedding or towels. Call 9-1-1 or your local emergency number and notify the fire department of your location. If it is safe to open a window and there is no smoke, open it to signal and yell for help.

What else should I know?

Plan and practice your fire escape drill.

There are some special situations to consider when developing and practicing your home fire escape plan:

Older Adults

An older adult with limited or restricted mobility should sleep on the ground floor. A special plan should be made to provide assistance to anyone in your house who may have limited or restricted mobility.

Children

Infants and young children will need assistance when escaping from the home. They should be involved with creating and practicing the family home fire escape plan.

People with Physical Disabilities

Anyone with physical disabilities should have their bedroom on the ground floor. A special plan should be developed to provide assistance to them. If a family member has a hearing impairment, special smoke alarms are available.

Public Emergency Management Plan

Public Buildings

Look for exit signs. Knowing your escape route is important - even when shopping, visiting the library, or spending time inside public buildings. If you hear a fire alarm in a public building, follow any instructions given over the public address system. In a hotel, take your room key with you as you may encounter smoke and need to re-enter your room for safety.

Red Cross Emergency and Disaster Services

In partnership with first responders, emergency managers, public officials, and in collaboration with other voluntary sector organizations, the Canadian Red Cross may provide emergency and disaster services such as emergency lodging, reception and information, emergency food, emergency clothing, personal services and family reunification services. If you have been affected by a personal disaster, such as a house fire, contact us at 1-888-800-6493. Otherwise, contact your closest service location for general enquiries.

Inquire at your workplace, your child's school or daycare about their emergency plans. Find out about their evacuation plans and how they will contact family in an emergency. Make sure that you keep all relevant contact information up to date at work and at your child's school or

Public Emergency Management Plan

daycare, and make sure any people designated to pick up your child are familiar with your emergency plan.

Think of your neighbors. Identify anyone who may need assistance during an emergency and discuss a plan with them and other neighbors. For instance, help them prepare an emergency plan and emergency kit, and arrange to check in on that person during an emergency, like a power outage.
